INTRODUCTION

Legal basis

Article 128 of the Financial Regulation applicable to the general budget of the European Communities stipulates that the provisional consolidated accounts shall be accompanied by the report of each institution and body on budgetary and financial management during the year.

The present report analyses the appropriations managed by the European Commission in 2011, i.e. the operational appropriations of the European Union and the administrative appropriations of the Commission (including pensions of other institutions). The administrative appropriations of other institutions are included only in some relevant consolidated summary tables.

The Financial Regulation sets out the provisions on including a transfer summary per budget line (Article 122.2) and a list of consolidated recoveries (Article 72 together with Article 81 of the Implementing Rules) with the current report. These are presented as Annexes I and II.

The analysis follows the European Union's accounting rule No 16 on the presentation of budget information in annual accounts, based on the International Public Sector Accounting Standard (IPSAS) 24 "Presentation of Budget Information in Financial Statements" issued by the International Public Sector Accounting Standards Board (IPSASB) in December 2006. According to this rule, the comparison of the budget and actual implementation shall be presented, for each heading of the multiannual financial framework separately, on the basis of both the original and the final budget amounts. Changes approved by the Budget Authority (BA) to revise the original budget and the actual implemented amounts shall also be explained.

Content of the 2011 report

PART A of the report analyses the year at budgetary level including:

- a summary of the various stages of the budgetary procedure 2011, explaining how the appropriations for the 2011 financial year were arrived at during the process of budgetary negotiation and the establishment of the budget;
- a description of the main adjustments to this budget during the financial year and reasons for these adjustments, leading to the final appropriations of the year;
- an overview of the implementation of expenditure in 2011;
- an assessment of the evolution of the outstanding commitments (*RAL - reste à liquider*).

PART B of the report is an analysis of implementation by detailed Multiannual Financial Framework (MFF) headings, as set out in the technical adjustment of the financial framework [COM(2010)160], with tables and text showing the appropriations made available, their implementation and the unused amounts carried forward. The evolution of the RAL in 2011 is integrated in these implementation tables.

They are linked to *cumulative programme tables* showing, for major programmes,

- the programme allocation as revised in early 2012;
- the implementation of commitments and payments by year throughout the current programming period;
- the cumulative situation of commitments and payments;
- the volume of outstanding commitments of the current programme, compared to the total RAL of the detailed MFF heading.

PART C of the report is an analysis of the own resources.

The report contains three annexes:

- Annex I transfer summary;
- Annex II consolidated recoveries;
- Annex III on the absorption of the oldest outstanding commitments in 2011.

Definitions applied in this report

The implementation tables consist of:

<i>Total appropriations:</i>
- Initial budget: appropriations voted by the Budget Authority (BA) including the reserves for European Globalisation Adjustment Fund and the Emergency Aid Reserve, but excluding the provisional appropriations entered in article 40 01 40 <i>Administrative reserve</i> or 40 02 41 <i>Differentiated appropriations</i> (in reserves for financial interventions). The release of the provisional appropriations in the course of the budget year is subject to given conditions. Even if put in reserve and not available, the unreleased amounts at year-end are considered as appropriations (voted budget) in calculating the implementation rates, notified via footnotes of the column "Total appropriations".
- Amending budgets (AB).
- Budget Authority transfers: transfers submitted to the BA for decision or for information.
- Commission transfers: transfers decided by the Commission on its own authority.
- Carryover from 2010: refers to budgetary appropriations carried forward by decision or automatically.
- Assigned revenue: In order to harmonise the presentation with the annual accounts of the European Union, appropriations include assigned revenue. This column includes also appropriations carried over from previous year.

Implementation	
-	Actual 2011 and Rate: For the purpose of analysing implementation, a distinction between budget appropriations and assigned revenue is relevant. The nature of the implementation of assigned revenue is different in the sense that their use may be subject to specific conditions: normally for assigned revenue, payments are entered in the budget with an amount corresponding to the commitments, even if it is clear from the outset that payments will be implemented only in later years; furthermore, appropriations that remain unused at the end of the year will not be cancelled, but carried forward automatically (with the exception of refunds carried over).
-	Actual 2010: Presented for comparison. The budget nomenclature of 2011 is applied.
-	Carryover to 2012: As well as budgetary appropriations carried forward by decision or automatically, this also includes assigned revenue in order to illustrate the actual impact of under-spending,

The terminology is shown in the schematic table on types of appropriation below:

Budgetary appropriations are C1 (excluding EFTA) + C2 + C3 +C7 + C8. The first item covers 2011 appropriations.

Amounts are generally provided in EUR million or EUR billion after rounding.

Date of extraction

The implementation data is based on the preliminary data serving as a basis for the provisional accounts at end March 2012.

Note: The information contained in this report is without prejudice to the content of the official Commission documents on the closure of the accounts. Readers should refer in particular to the final Revenue and Expenditure Account for the official figures on the 2011 budget outturn.

PART A - Overview: Budget 2011

A.1 ESTABLISHING THE INITIAL BUDGET

A.1.1 Budgetary procedure 2011

The Commission adopted its statement of estimates for 2011 on 27 April 2010 and consolidated the statements of other institutions in a Draft Budget on 26 May 2010. Commitment appropriations were set at EUR 42 565 million, 2.2 % higher than the 2010 budget, and equivalent to 1.14% of GNI. The level of payment appropriations proposed increased by 5.8%, to a total of EUR 130 136 million, or 1.04 % of GNI. The margins remaining under the ceilings of the multiannual financial framework were EUR 1 236 million for commitment appropriations and EUR 4 429 million for payment appropriations.

In August 2010, the Council finalised its position on the Draft Budget 2011. The Council set commitment appropriations at EUR 141 777 million, a cut of EUR 788 million compared to the DB¹. Payment appropriations were reduced by EUR 3 609 million to EUR 126 527 million, or 1.01 % of GNI. The biggest cuts were made in Heading 2 *Preservation and management of natural resources* (EUR 475 million in commitments and EUR 821 million in payments), in Heading 5 *Administration* (EUR 162 million in commitments and payments), in Heading 4 EU as a global player (EUR 94 million in commitments and EUR 591 million in payments), in Sub-Heading 1a *Competitiveness for growth and employment* (EUR 47 million in commitments and EUR 891 million in payments), and in Sub-Heading 1b *Cohesion for growth and employment* (EUR 1 075 million in payments).

The European Parliament's amendments on the Draft Budget 2011 were voted in October 2010. Total commitment appropriations were set at EUR 143 070 million; EUR 1 292 million higher than Council's position. The level of payments was set at EUR 130 559 million (1.04 % of GNI); EUR 4 032 million higher than the Council's position.

During the course of the procedure, the Commission presented three letters of amendment to the DB. Amending Letter No 1 proposed to create a new budget section (section X) with the related budget appropriations for the European External Action Service (EEAS), as from 1 January 2011. Since the EEAS operates with the means transferred from the Commission and the Council, the amending letter also amended the budget sections of the Commission (section III) and the Council (section II). Overall, when including the means transferred from the Commission and the Council, the proposed administrative expenditure for the EEAS in 2011 amounted to EUR 476 million, whereas the total number of establishment plan posts amounted to 1 643.

Amending Letter No 2/2011 covered the proposal to reinforce the EU contribution to EUROPOL and the three new financial supervision authorities (EBA, EIOPA and ESMA²), for a combined overall amount of EUR 2 million in commitment and payment appropriations, as well as a modification to the establishment plans of these agencies. Finally, the amending letter proposed the creation of a new budget item for the guarantee provided by the European Union in accordance with the provisions of Article 122(2) TFEU, as well as a corresponding revenue article, without budgetary implications.

1 Taking into account the final draft estimates of the institutions, the rectified DB 2011 amounted to:

- EUR 130 136 million in commitment appropriations;
- EUR 142 565 million in payment appropriations.

2 European Banking Authority (EBA), European Insurance and Occupational Pensions Authority (EIOPA), European Securities and Markets Authority (ESMA).

Amending Letter n°3/2011 concerned the usual update of the budget requests for the agricultural sector as well as for the International Fisheries Agreements, in accordance with the Interinstitutional Agreement on budgetary discipline and sound financial management of 17 May 2006 (OJ C 139/2006). In addition, this Amending Letter proposed to create a new budget item for Energy efficiency and renewable initiatives, within the framework of the *Energy projects to aid economic recovery*. An overall decrease for Heading 2 *Preservation and management of natural resources* of EUR 347 million in commitments and EUR 346 million in payments was proposed, as a consequence of a downwards revision of the estimated needs for agricultural expenditure (- EUR 346 million, mostly due to higher than expected assigned revenue received in 2010 and by the favourable situation on agricultural markets), and a minor downwards revision of the International Fisheries Agreements (- EUR 1 million in commitments).

The net effect of the three letters of amendment was to decrease the initial Commission DB to EUR 142 254 million in commitments and EUR 129 826 million in payments.

In accordance with article 314 of the TFEU, a Conciliation Committee was called to seek a compromise between the two branches of the budgetary authority. At the end of the 21-day period allowed for conciliation, compromise was very close. However, Council and Parliament did not reach final agreement on the 2011 budget through conciliation in November 2010. As a consequence, the Commission on 26 November 2010 adopted a new Draft Budget 2011, which reflected the near-compromise reached in conciliation. This allowed the Council and the Parliament to reach political agreement on the 2011 budget at a trilogue on 6 December 2010, which subsequently led to the final adoption of the 2011 budget on 15 December 2010. The final compromise on the 2011 budget contained the following elements:

- Agreement on the overall level of payment appropriations of EUR 126 527 million (1.01 % of GNI), as proposed by the Commission in the new Draft Budget.
- Agreement on the level of commitment appropriations for Headings 1a, 1b, 2, 3a, 3b and 4, as proposed by the Commission in the new Draft Budget.
- Agreement on an increase in commitment and payment appropriations for administration (Heading 5) by EUR 91 million, as compared to the new Draft Budget, to reflect the Court of Justice ruling on the salary adjustment for 2009.
- Agreement on a minor redistribution of the level of payment appropriations for Headings 1a, 1b, 2, 3a and 4, as compared to the new Draft Budget, in order to accommodate the increase in the level of payment appropriations for heading 5 as set out above, within the overall level of payment appropriations proposed by the Commission in the new Draft Budget.

The voted payment appropriations represent 0.89% of GNI.

The difference between commitment and payment appropriations was EUR 15 billion.

In above tables, the analysis of the variation of Heading 3b has to take into account the fact that budget 2010 included the European Solidarity Fund which has no initial appropriations, but is rather financed as needed via amending budgets.

A.1.2.3 Reserves

The voted budget included following reserves:

- European Globalisation Adjustment Fund EUR 500 million in commitment appropriations.
- Emergency Aid Reserve EUR 254 million in commitment appropriations and EUR 100 million in payment appropriations.
- Provisional appropriations (reserves for administrative expenditure and for financial interventions) of EUR 223 million in commitment appropriations and EUR 160 million in payment appropriations.

The breakdown of the provisional appropriations, which are not included in the concept of initial budget used in this report, was as follows:

(million EUR)

MFF Heading	Description	CA	PA

In the course of the year, provisional appropriations were increased via Amending Budget 6/2011 by EUR 23 million in commitments in Heading 2 (Maritime policy).

A.2 CARRYOVER FROM 2010

A.2.1 Carryover Decision for 2011

The carryover decisions of the Commission, taken on 11 February 2011³, concerned non-differentiated appropriations, commitment appropriations and payment appropriations carried forward and structural funds commitments made available again.

The appropriations of title 32 were carried over on the ground of the adoption of the legal basis in the fourth quarter of the year: Regulation (EU) No 1233/2010 was formally adopted on 15.12.2010).

All others were carried over on ground of most of the preparatory stages of the commitment procedure completed by 31.12.2010. Appropriations were all committed before the deadline of end March 2011, except an amount of EUR 8 775 in International Fisheries due to a revision of estimates concerning the Protocol with Madagascar.

Amending Budget 1/2011, mobilising the EU Solidarity Fund did not have any affect on the overall level of payment appropriations in the 2012 budget. This is because the increase of EUR 182 million necessitated by the mobilisation of the Fund, was offset by the use of the negative reserve (Chapter 40 03). The reserve was replenished with the adoption of the Amending Budget 3/2012.

See also the Amending Budgets in part C "Own resources" (C.4).

A.3.2 Impact of Amending Budgets between MFF Headings⁴

(million EUR)

MFF Heading	CA	PA
1a Competitiveness	0	- 104
1b Cohesion	+ 3	+ 453
2 Preservation and Management of own Resources	0	- 433
3a Freedom, Security and Justice	+ 41	+ 44
3b Citizenship	+ 235	+ 235
4 EU as a Global Player	+ 5	+ 5
5 Administration	0	0
TOTAL	+ 284	+ 200

⁴ In order to present all adjustments in a coherent way in this report, the same distinction between provisional appropriations and authorised appropriations has to be made both in amending budgets and in transfers: amounts released from reserve are taken into consideration as budgetary adjustments of authorised appropriations, amendments of the reserve not affecting directly operational lines are discarded.

Amending Budget 6/2011 increased the reserve for 11 09 *Maritime policy* in commitments by EUR 23 million, and lifted the reserve for 21 06 07 *Banana accompanying measures* (EUR 43 million in CA and EUR 29 million in PA).

Therefore, the impact of Amending Budgets in the implementation tables of this report differs with EUR 20 million in commitments (43-23) and EUR 29 million in payments in Headings 2 and 4 from the above table.

The main increase in commitments is due the mobilisation to the EU Solidarity Fund. It is important to note that this mobilisation, under Heading 3b (EUR 235 million), and Heading 4 (EUR 5 million), has no affect on the margins available under the ceiling of the multi-annual financial framework.

Payment appropriations were increased by EUR 200 million to European Social Fund at year-end via AB 6/11 completing an amount of EUR 253 million transferred from other headings. All other transactions were budgetary neutral.

A.4 TRANSFERS 2011

A.4.1 Total Impact of Transfers

In 2011, 56 transfers (2010: 69) were submitted to the Budget Authority, 53 for decision (2010: 66) and 3 for info (2010: 3). Of the transfers for decision, 23 concerned the European Globalisation Adjustment Fund

In the presentation used in this report, transfers affect the total appropriations by increasing them with amounts released from the provisional appropriations either by Budget Authority transfer or Commission transfers. The appropriations of other reserves, *Reserve for the European Globalisation Adjustment Fund* in Heading 1a and *Emergency Aid Reserve* in Heading 4 are part of the initial budget.

Transfers between budget lines modify the total appropriations of those lines. In 2011, all significant changes in the breakdown between MFF headings were made via the Global Transfer and DEC52. The impact of all transfers is summarised in the tables below:

Commitments (million EUR)

After these transfers from the provisional appropriations and the adjustment via Amending Budget 6/2011 for 21 06 07 *Banana accompanying measures*, the following amounts remained unused:

A.4.2 The Global Transfer

The Global Transfer, deemed approved (the Council did not act) on 15 November, concerned only payment appropriations, the volume of reinforcement and reductions totalled EUR 719 million (2010: EUR 1 792 million) broken down by heading as follows:

(million EUR)

MFF Heading	Reinforcements	Reductions	Impact between headings
1a Competitiveness	464	- 299	165
1b Cohesion			
2 Natural resources	3	- 111	- 108

4 EU as a global player	206	- 281	- 75
5 Administration	1		1
TOTAL	719	- 719	0

In total, 103 budget lines (2010: 95) were concerned, 57 for reinforcement and 46 for reductions (2010: 51 and 44).

A complete summary on Budget Authority transfers is given in Annex I.

A.4.3 DEC 52, an end year payment appropriation transfer

Taking into account the payment needs for the European Social Fund (ESF), the Commission proposed on 25 November 2011 an end of year transfer in order to reinforce this Fund. Small reinforcements in Headings 1a and 5 were also proposed. The volume of reinforcement and reductions totalled EUR 605 million broken down by heading as follows:

RAL	194 051	66 228	141 002	59 655		- 2 122		207 046	+7%		

These implementation rates are strongly affected by the inclusion of assigned revenue which by nature is different from the budgetary appropriations. Their implementation rate is not comparable to the rate of budgetary appropriations, because of their different nature: their use may be subject to specific conditions, commitments and payments are entered in the budget of the year at the same amount even if their planned implementation schedule would cover later years, unused appropriations are not cancelled but carried over automatically (with the exception of refunds carried over from the previous year).

The table below gives the 2011 implementation of authorised appropriations by policy area:

⁵ Includes the provisional appropriations CA EUR 2 million and PA EUR 1.9 million.

These tables show how implementation rates vary significantly from one type of assigned revenue to another. This is due to different rules applying with regard to the recovery, carry-over and implementation of the corresponding appropriations.

The EAGF assigned revenue appropriations, which originate from former negative expenditure sources (conformity clearance, irregularities and milk levy), are usually used towards the end of the budget year of recovery. The amounts collected in one budget year which are not used at the end of the year are normally fully consumed in the following year, and no appropriations are carried forward to the year after that. In addition, the revenue stemming from the temporary self-financing Sugar Restructuring Fund is also treated as assigned revenue, but these appropriations showed relatively low levels of implementation in 2011 as not all aid payments under the Fund have yet been made.

The implementation of EFTA appropriations follows a different pattern and the implementation of both commitment and payment appropriations is relatively high in comparison with the other types of assigned revenue. Within a given year both commitment and payment EFTA appropriations are almost fully implemented. These appropriations originate from the annual participation of EFTA countries in certain Community programmes and are mainly concentrated in Heading 1a, accounting for 94 % of available EFTA commitment appropriations.

The other types of assigned revenue mainly concern third party or third country participation in Community programmes.

TOTAL	194 395	66 559	144 572	62 836	- 2 129	207 443	+ 7%

This chapter analyses the outstanding commitments by the structure per year of origin and per budget heading and shows absorption profiles. It suggests that, in spite of the evolution of the volume, the RAL can still be seen as a result of reasonable time-lag between commitments and payments existing in comparable proportions in all different budget areas using differentiated appropriations.

Total RAL	206.5	2.3	100%	100%

The overall conclusion is that the volume of outstanding commitments of major programmes corresponds to their share in differentiated appropriations.

The total RAL corresponds to 2.3 years of commitments at 2011 level and to 2.8 years in payments. This is in line with the N+2/N+3 reference of the Cohesion policy (heading 1b) and the N+2 reference of the rural development and the fishery funds (heading 2) which are the main contributors to the RAL.

The volumes of RAL vary considerably, but the issue of outstanding commitments concern similarly all the headings operating with differentiated appropriations. It is a consequence of the time lag between commitment and payment rather than a problem specific to certain EU policy areas.

The main adjustments concerned the payment appropriations of the following budget lines:

Increases:

- 09 04 01 01 *Support for research cooperation in the area of information and communication technologies (ICTs - Cooperation)* by EUR 157 million following due to progress in implementation;
- 08 04 01 *Cooperation – Nanosciences, nanotechnologies, material and new production technologies* by EUR 147 million following the simplification of procedures and the improved quality of proposals;
- 15 07 77 *People* by EUR 72 million to improve the time to grant by the Research Executive Agency (REA);
- 08 02 01 *Cooperation – Health* by EUR 40 million following a new estimate taking into account the progress of research projects signed between 2007 and 2010 and the acceleration of procedures for the evaluation and negotiation of the call for proposals FP-7 Health-2011, which reduced the time needed for contracting.

Decreases:

- 08 07 02 *Cooperation – Transport – Clean Sky Joint Undertaking* by EUR 51 million, following the review of industrial policy approach carried out by the Clean Sky Joint Undertaking;
- 08 22 03 01 *Completion of the sixth EC Framework Programme (2003 to 2006)* by EUR 30 million, as certain types of projects were closed with reductions in the Community contribution.

The implementation of Decommissioning and Waste Management Programme (D&WM) is subject to complex and time consuming license, governmental and local authority authorisation processes which can affect the accuracy of annual payment forecasts.

The decrease of payment appropriations concerned budget lines 06 03 03 *Financial support for projects of common interest in the trans-European transport network* (EUR 60 million) essentially for timing reasons and to allow full use of the carryover from 2010, and budget line 06 03 05 *SESAR Joint Undertaking* (EUR 39 million), where cash-flow was reduced to a minimum following the recommendations of the Court of Auditors.

During the 2011 budget procedure, the Budgetary Authority increased the level of commitment appropriations by EUR 18 million, but decreased the level of payments by EUR 29 million. An acceleration in the rate of commitments in 2011 and good implementation in the participating countries led to a bigger volume of interim payments than foreseen, and thus the level of payments had to be reinforced by transfer.

With a view to facilitating access to finance of small and medium enterprises (SMEs), the Competiveness and Innovation framework programme (CIP) implements two financial instruments for SMEs, i.e. GIF (venture capital) and SMEG (loan guarantees), both of which are managed by the European Investment Fund (EIF) on behalf of the Commission.

As equity markets started to recover in 2011, the demand for GIF funding turned out to be significantly higher than during previous years of the programme. At the same time there continued to be a sustained level of demand for SMEG guarantees due to applications from countries not yet covered and to extensions of existing deals with financial intermediaries experiencing high loan demand.

The budget lines increased were 02 02 01 *Competitiveness and Innovation Framework programme – Entrepreneurship and Innovation Programme* (+EUR 52 million), 01 04 04 *Competitiveness and Innovation Framework Programme – Entrepreneurship and Innovation Programme* (+EUR 32 million) and 32 04 06 *Competitiveness and Innovation Framework Programme – "Intelligent Energy – Europe" programme* (+EUR 32 million). Transfers doubled the initial appropriations for the two latter budget items.

For budget line 32 04 14 01 *Energy networks*, delays in requests for pre-financing and intermediate payments led to a complete revision of payment schedules. Payments for these large-scale infrastructure projects such as Nabucco, Poseidon (Italy-Greece gas interconnection) and Galsi (Algeria-Italy gas interconnection) are typically made on a limited number of occasions over the lifetime of the project, reflecting the various steps of project implementation (e.g. procurement contract concluded, works achieved). Payment appropriations were reduced via amending budgets by EUR 296 million to cover the negative reserve of EUR 182.4 million created by AB 1/2011, and the financing needs in payment appropriations of EUR 19.5 million for the EU Solidarity Fund and EUR 50 million for the European Globalisation Adjustment Fund in AB 2/2011, as well as EUR 44 million for Heading 3a in AB 4/2011, and via several transfers totalling EUR 147 million.

The budget line 32 04 14 02 *Energy projects to aid economic recovery - Carbon Capture and Storage (CCS)* was decreased by EUR 55 million, due to a lower pace of implementation of these technologically and logistically complex activities, whereas the budget line 32 04 14 04 *Energy efficiency and renewable initiatives* was reinforced.

In 2011 implementation under Heading 1b *Cohesion for Growth and Employment* was very significant. The European Social Fund (ESF), in particular implemented, over EUR 1 billion of additional appropriations, made available through a combination of amending budgets and transfers.

In fact, there has been a shortfall in payment appropriations under Heading 1b, without which the implementation could have been even higher. In the last three weeks of the year, requests for reimbursement of over EUR 15 billion arrived from the Member States. Even allowing for those which arrived too late to be treated in 2011, some EUR 5 billion more could have been paid had the necessary appropriations been available.

The higher than expected payment needs were due principally to the fact that certain payments originally foreseen in 2010 were made in 2011. These concerned mainly a series of operational programmes in Spain and Poland for which payments had been interrupted in 2010 as a result of irregularities identified by auditors in the management and control systems.

The speed of programmes was so fast that at the end of September, implementation had exceeded 87 % of appropriations for the 2007-2013 programming period. As response EUR 453 million were allocated via the Amending budget (including EUR 200 million of fresh appropriations) and some

EUR 600 million via the end-year transfer DEC 52. Even so, it is estimated that a further EUR 1.6 billion could have been paid in 2011 had there been enough appropriations in the budget.

On the basis of the situation in November, with lower than expected claims from the Member States, significant amounts were made available for transfer to the European Social Fund. However, as the flow of payment requests accelerated in December, it is estimated, that some EUR 3 billion could possibly have been paid in 2011 had there been enough appropriations in the budget.

Nevertheless, in the last weeks of 2011 the flow of payment requests for the Cohesion Fund accelerated, with the result that outstanding payment claims at year end stood at some EUR 1.3 billion. It is estimated that approximately half of this amount could have been paid in 2011 had there been enough appropriations in the budget.

In the assigned revenue, the share of European Agricultural Guarantee Fund receipts is the following:

The receipts actually carried over from 2010 into 2011 amounted to EUR 905 million and has been entirely used in financing expenditure of the 2011 budget year in accordance with article 10 of the Financial Regulation. This amount covered expenditure of EUR 404 million for the operational funds for producer organisations and of EUR 502 million for the single payment scheme.

The receipts collected in 2011 amounted to EUR 667 million. A part of this assigned revenue amounting to EUR 225 million was used to cover 2011 expenditure for the operational funds for producer organisations while the balance of EUR 442 million was automatically carried over into the 2012 budget in order to fund budgetary needs of that year.

- *Article 05 02 01 – Cereals:* The under-implementation of these appropriations resulted mainly from the significant sales of cereals out of intervention at prices significantly higher than those forecasted in the 2011 budget. These sales led to realising considerable gains for the 2011 budget which are shown in the budget implementation as negative amounts. An under-implementation was also observed for the potato starch aids due to lower production.
- *Article 05 02 03 – Refunds on Non-Annex I products:* The lower uptake of the budget appropriations was primarily due to the lower expenditure incurred for payment of export refunds for dairy products incorporated in the exported processed agricultural products.
- *Article 05 02 04 – Food Programmes:* Member States almost fully implemented the 2011 plan for food distribution to the most deprived persons. The higher implementation for this budget article was mainly due to higher than usual amounts paid by Member States in 2011 for outstanding intra-EU transport costs for the previous years' plans.
- *Article 05 02 06 – Olive Oil:* The lower implementation of the budget appropriations was due to the fact that one Member State did not fully implement the 2010/2011 work programme for quality improvement measures of operator organisations.
- *Article 05 02 08 – Fruits and vegetables:* As regards the operational funds for producer organisations, there was some under-implementation, mainly for advanced payments for plans approved in 2011, as some Member States had overestimated their implementation forecast.

In 2011, expenditure for the aid to producer groups for preliminary recognition exceeded the budget appropriations, with particularly a notable increase in one Member State.

For the exceptional support measures taken in the context of the E-coli crisis (Regulation (EC) No 585/2011), Member States declared expenditure which corresponds to approximately 79% of the amount allocated for this measure. Residual payments are expected to be made in budget year 2012.

For the School Fruit Scheme, several Member States had an implementation which remained below their budgetary allocation.

- *Article 05 02 09 – Wine:* The slight under-implementation of the budget appropriations was primarily due to a minor under-implementation of the national support programmes and of the grubbing-up scheme by certain Member States.

- *Article 05 02 10 – Promotion:* Member States did not pay all the amounts foreseen in the budget for promotion activities on the basis of the promotion decisions taken by the Commission.
- *Article 05 02 11 – Other plants products:* The higher implementation of the budget appropriations for dried fodder was due to higher quantities receiving the aid than the ones foreseen in the budget. However, as regards the POSEI, the under-execution observed for the market measures in this article was partly compensated by the higher implementation of these programmes on the direct aids item 05 03 02 50.
- *Article 05 02 12 – Milk and milk products:* Skimmed milk powder was sold out of intervention at prices which were higher than originally forecasted in the 2011 budget. These sales resulted in realising gains for the 2011 budget. However, the expenditure for School Milk was lower than the final appropriations which were increased by EUR 10 million by the Budgetary Authority compared to the initial needs requested by the Commission. Finally, a minor underutilisation was also observed for payments on outstanding export refund certificates as well as on private storage for butter.
- *Article 05 02 13 – Beef:* The higher implementation of the budget appropriations resulted from the higher expenditure incurred by Member States for export refunds because of the significantly higher quantities of beef meat and live animals exported with refunds in 2011.
- *Article 05 02 15 – Pig meat, eggs, poultry meat and beekeeping:* The higher implementation of the budget appropriations was primarily attributable to the expenditure incurred by Member States for private storage aids for pig meat which were introduced in January 2011, and for which no appropriations were foreseen in the 2011 budget. It also related to higher than expected quantities of poultry exported with refunds. Finally, the implementation rate for beekeeping was slightly below the budget appropriations based on the new increased amounts per Member State decided in 2010.

- *Item 05 03 01 01 – Single Payment Scheme (SPS):* The expenditure incurred was almost at the level of the requested needs for this scheme (under-implementation of only 0.2 % of needs). The rate of implementation of most Member States has increased again compared to the one of last year, thus indicating an improvement in the management of the SPS financial envelopes as well as the application of the mechanism of unspent funds which Member States were allowed to use for financing the specific support measures under Article 68.

- *Item 05 03 01 02 – Single Area Payment Scheme:* The under-implementation of the budget appropriations was due to the fact that, in some Member States, the total eligible area declared by farmers was smaller than the area fixed in the legislation and which was used for the purpose of calculating the maximum rate of aid per hectare.
- *Items 05 03 01 05 and 05 03 02 44 – Specific Support Measures under Article 68:* 2011 was the first year of implementation of the specific support under Article 68. There was a global under-implementation of the budget appropriations for both items as many Member States experienced implementation difficulties due to the novelty of the measures and apparently because of insufficient/belated communication to the farmers. It is expected that the second year of implementation will show a significant improvement as farmers will become more familiar with the measures and national administrations will have gained experience.
- *Item 05 03 02 06 – Suckler-cow premium:* In 2011, the budget appropriations were slightly under-implemented by around 2% of these appropriations. This slight under-implementation may be due to a small decrease in the herd and to the application of sanctions for not complying with the eligibility conditions.
- *Item 05 03 02 18 – Aid for potato starch:* In 2011, the budget appropriations were significantly under-used at around 20% of these appropriations. This was the result of exceptionally bad climatic conditions that had an unexpected impact on the level of production.
- *Item 05 03 02 50 – POSEI – Union support programmes:* As regards the POSEI, the higher implementation of the programmes on the direct aids was compensated by the lower rate observed for market measures (Article 05 02 11). The overall implementation in 2011 for the POSEI programmes, both market measures and direct aids, was around 99% of the budget appropriations.

For the current programming period, the actual expenditure declarations of the Member States received by the Commission in November were lower than the forecasts provided by the Member States at the beginning of September. With respect to the previous programming period, despite the significant number of programmes closed in 2011, the amounts involved were below the initial plans due to the complex and long-lasting closure proceedings.

Budget line 07 03 07 *LIFE+ (Financial Instrument for the Environment - 2007 to 2013)* was decreased by EUR 36 million in payment appropriations, as the number of requests for payments in 2011 was below the initial estimates. Also in some instances, even if the interim progress reports were received, the thresholds for the second pre-financing payments were not met and payments

had to be postponed to 2012. As regards final payments, eligible expenses were sometimes lower than the estimates in the initial grant agreement.

Amending Budget 4/2011 reinforced EU actions under the External Borders Fund, the European Return Fund and the European Refugee Fund due to high migratory pressure resulting from developments in the Southern Mediterranean. The reinforcement was allocated to support the efforts of the Member States most directly concerned, following the European Council conclusions of March 2011. The increase of payment appropriations corresponded to the additional pre-financing (75% for External Borders Fund and European Return Fund and 80% for European Refugee Fund).

It was possible to transfer some payment appropriations at the year end, in particular in relation to 18 03 03 *European Refugee Fund*, where EUR 18 million was available due to over-estimation of claims for final payments by beneficiaries, a relatively high occurrence of recovery orders, and late reception of the final reports for evaluation.

In commitments, an internal redeployment of EUR 10 million was made, mostly stemming from the delayed launching of the 2011 call for framework partners for budget line 18 05 09 *Prevention of and fight against crime*.

In payments, the consumption was lower than foreseen mainly in budget lines 18 05 08 *Prevention, preparedness and consequence management of terrorism* and 18 05 09 *Prevention of and fight against crime* partly due to the inability of final beneficiaries to ensure their own contribution to the projects at a time of financial crisis.

The increase of appropriations concerned 18 02 03 02 *European Agency for the Management of Operational Cooperation at the External Borders – Contribution to Title 3* due to the political situation in North Africa. Frontex operational activities in the Mediterranean Sea intensified significantly from May 2011. In addition, efforts were made to speed up the rate of payments.

Implementation of the civil protection has improved over the last years. Anyway, a full implementation of the instrument is very difficult to achieve, because of the unpredictability of disasters and the need to keep sufficient resources available with a view to facilitate a response whenever they occur.

In commitments, adjustments were made to compensate the change of the status of Montenegro and Iceland from potential candidate countries to candidate countries.

The most significant adjustments of payment appropriations concerned the following budget lines:

Increases:

- 05 05 02 *Instrument for Pre-accession Assistance for Rural Development (IPARD)* EUR 30 million as a result of revised pre-financing rules of IPARD;
- 22 02 02 *Transition and institution-building assistance to potential candidate countries* EUR 30 million following the adoption of the Financing Agreements for Serbia and Albania;
- 13 05 01 02 *Instrument for structural policies for pre-accession – Closure of pre-accession assistance, relating to eight applicant countries* EUR 28 million to cover payments, some of which were originally expected for 2010 from this line with no appropriations for 2011.

Decreases:

- 13 05 01 *Instrument for structural policies for pre-accession (ISPA) – Completion of other previous projects* EUR 164 million following delays in closing projects (extension of some deadlines, for some projects reimbursement due to the Commission instead of a final payment);
- 22 02 07 01 *Regional and Horizontal Programmes* EUR 57 million following the redirecting of grants for Turkey, Croatia, Bulgaria and Romania to innovative and green projects needing longer preparation;
- 22 02 01 *Transition and institution-building assistance to candidate countries* EUR 38 million due to delays in IPA 2007 programme for Turkey;
- 04 06 01 *Instrument for Pre-Accession (IPA) – Human resources development* EUR 27 million due to problems in the financial verification of grant expenditure carried out by the Turkish authorities.

The main adjustments to appropriations concerned the following:

- Budget line 19 08 01 02 *European Neighbourhood and Partnership financial assistance to Palestine, the peace process and UNRWA* +EUR 100 million in commitments, with a view to frontloading needs for 2012, and –EUR 41 million in payments.
- Budget line 19 08 01 03 *European Neighbourhood and Partnership financial assistance with Eastern Europe* was reinforced by +EUR 74 million in payments, since the new ENPI regulation accelerated payments.
- Budget line 19 08 01 01 *European Neighbourhood and Partnership financial cooperation with Mediterranean countries* after reprogramming (commitments +EUR 31 million, payments –EUR 98 million transferred by the Commission to Palestine and Eastern Europe lines).
- Budget line 19 08 02 01 *Cross-border cooperation (CBC) contribution from Heading 4* +EUR 21 million to cover additional payment needs transmitted by the Joint Management Authorities.

RAL	6 960	1 706	2 602	368		- 169		7 319	5%		

The main adjustments concerned following budget lines:

- Decreases in budget line 19 10 01 01 *Cooperation with developing countries in Asia*: EUR 25 million in commitments as consequence of the policy decision to reinforce sub-heading 4.0.2 (ENPI), particularly in the light of developments in the Southern Mediterranean, and EUR 56 million in payments, because two budget support payments for Nepal and Pakistan had been postponed and other payments for China, India, Indonesia, Bangladesh, Cambodia, Pakistan and EAC Executive Agency were delayed;
- Decrease of EUR 26 million in commitments in budget line 19 09 01 *Cooperation with developing countries in Latin America* as a financial reallocation from Venezuela, Mexico and Brazil to the Southern Mediterranean;
- Increase of EUR 126 million in commitments and EUR 29 million in payments in budget line 21 06 07 *Banana Accompanying Measures (BAM)* after the delayed adoption of new BAM measures only in 2011. Beside appropriations released from the reserve, appropriations frontloaded in 2010 in favour of 19 04 01 *European Instrument for Democracy and Human Rights (EIDHR)*, and 19 08 01 01 *European Neighbourhood and Partnership financial cooperation with Mediterranean countries* were now given back;
- Lifting of reserve (EUR 65 million in commitments and EUR 58 million in payments) for budget line 21 04 01 *Environment and sustainable management of natural resources, including energy*. Some contracts were signed only at end-December and EUR 30 million of payment appropriations were transferred from the line at year-end.

Commitment appropriations were decreased via Amending Budget 6/2011, primarily with a view to frontloading the 2012 needs for Palestine. The appropriations were made available due to the cancelled Macro Financial Assistance (MFA) operation in Kosovo (EUR 51 million) and operations in favour of the Kyrgyz Republic (EUR 30 million) and Georgia (EUR 23 million) which could not be finalised by the end of 2011.

The carryover to 2012 includes assigned revenue of EUR 125 million in commitments and EUR 160 million in payments. EUR 27 million of voted commitment appropriations remained unused. The situation of payments was the following; EUR 73 million of payment appropriations carried over automatically from 2010 were cancelled, EUR 313 million of the year's appropriations remained unimplemented, of which EUR 287 million carried forward to 2012.

The under-implementation for salaries and pensions arises directly from the rejection by the Council of the salary adjustment for 2011. This decision came too late in the year for the appropriations to be put to other uses, and the amounts cannot be carried over, since pension and salary appropriations must be paid in their year of origin.

6 Includes the unused reserve of EUR 1.4 million of budget line XX 01 01.

7 Includes the unused reserve of EUR 1.4 million of budget line XX 01 01.

C.2 LEGAL BASIS

The basic rules on the system of the European Communities' own resources are laid down in Council Decision 2007/436/EC, Euratom.

Own resources are budgeted in Title 1 of the General Statement of Revenue¹⁰ (see also table above) on the basis of a set of forecast data (see next section). The breakdown of the total amount of own resources by type of own resource and by Member State results from the application of the rules laid down in the Council Decision on own resources and its implementing regulations. According to the Decision the total amount of own resources cannot exceed 1.23 % of the gross national income (GNI) of the EU.

Own resources can be divided into the following categories:

- traditional own resources (customs duties and sugar levies);
- the VAT based resource;
- the GNI based resource ("the additional resource"). This resource ensures the match between the total expenditure and the total volume of resources. It is calculated as the difference between total expenditure and all other budgeted revenue, including the other own resources.

Finally, a gross reduction in the GNI based contributions for the Netherlands and Sweden and a specific mechanism for correcting the budgetary imbalance of the United Kingdom are also part of the own resources system.

According to the principle of equilibrium of the EU budget, total budgeted revenue must equal total budgeted expenditure. As soon as the total amount of budgeted expenditure has been decided, the total amount of the GNI based resource needed to balance the budget can be determined.

¹⁰ The surplus of the previous exercise, which mainly results from the difference between own resources payments and implemented expenditure of the previous year, is included in Title 3. That title is, however, not examined here.

C.3 THE BUDGETARY FORECAST OF OWN RESOURCES

The data necessary for establishing the budgetary forecast of own resources is discussed and adopted at the annual forecasting meeting of the Advisory Committee on Own Resources (ACOR)¹¹. Representatives of the Commission and of Member States participate in the meeting.

The discussions concern the forecasts for the VAT and GNI bases and traditional own resources (customs duties and sugar levies). Furthermore, the Commission presents the results of its calculations of the correction for the UK budgetary imbalance, which is also a necessary element for establishing the own resources forecast. Both the forecasts for the draft budget 2012 as well as the updated forecasts for the year 2011 were adopted at the same meeting.

The Commission's forecasts of Member States' GNI and VAT bases are established on the basis of the spring economic forecasts from the Directorate-General for Economic and Financial Affairs, which have themselves been subject to prior discussions with experts from the Member States.

Sugar levies are forecasted by the Directorate-General for Agriculture on the basis of specific information and hypotheses concerning the outlook for agricultural markets and trade. Customs duties are forecasted on the basis of the latest outturn data on the weighted average rate of customs duties applied to import forecasts from the Directorate-General for Economic and Financial Affairs spring economic forecasts.

The forecasts mentioned above can be modified during the discussions with Member States at the ACOR meeting.

The updated data used for the 2011 own resources forecast was approved at the ACOR forecasts meeting of 17 May 2011 and budgeted in the Amending Budget No 4/2011.

11 The ACOR is set up by Council Regulation No 1150/2000 of 22 May 2000 (Title VIII).

C.4 THE PROCESS OF ADOPTING THE BUDGET

According to the principle of equilibrium of the EU budget, the amounts of budget revenue and payment appropriations must be in balance.

The amount of expenditure in the adopted budget, signed by the President of the European Parliament on 15 December 2010, was fixed at EUR 126 527.1 million, which was EUR 3 620.1 million lower than the EUR 130 147.2 million in the DB, presented by the Commission in April 2010. In order to ensure equilibrium between budgeted revenue and expenditure this decrease was compensated by a decrease in the GNI-based resource, which is the "variable" resource that is used for balancing the budget. The forecast amounts of all other own resources remained the same as in the DB.

Budgetary adjustments

The revenue and expenditure estimates in the initial budget are subject to modifications during the budgetary year. Such modifications are budgeted in amending budgets. Adjustments in the Member States GNI-based own resources payments ensure that budgeted revenue exactly matches budgeted expenditure.

In 2011, altogether seven amending budgets were adopted. Their impact on the revenue side of the 2011 budget is indicated in the next table.

C.7 IMPLEMENTATION OF OWN RESOURCES

The custom duties collected amounted to 100.62 % of the amounts forecasted. The budgetary estimates were modified at the time the Amending Budgets No 4/2011 and 6/2011 were established (they were first increased by EUR 1.1 billion but later decreased by EUR 1.2 billion). These adjustments were based on one hand on the new macroeconomic forecasts of spring 2011 being more pessimistic than the previous ones and, on the other hand, on the evolution of the contributions. Actual amounts versus budgetary estimates for sugar levies reached 106.75 %.

The Member States' VAT and GNI payments corresponded closely to the budgetary estimate. The differences between the estimated twelfths and the amounts actually paid are explained by the differences in the euro rates used for budgetary purposes (see Article 10 (3) of Regulation No. 1150/2000) and the rates in force at the time when the Member States (not part of the EMU) actually made their payments. The changes in the exchange rates during 2011 had a negative impact of EUR 49 million and EUR 237 million for VAT and GNI respectively.

According to Council Decision No. 2007/436 on the system of the European Communities' own resources, the United Kingdom is granted a correction in respect of budgetary imbalances. As this amount is financed by the other Member States there should be no net effect on the budget. However, a positive amount of EUR 52 million was registered. This was caused by differences in the exchange rates similar to those for the VAT/GNI resources.

According to Council Decision No. 2007/436 the Netherlands and Sweden benefit from a gross reduction in their annual GNI-based contributions for the period 2007 - 2013. The gross reduction for the Netherlands and Sweden, which equals respectively EUR 605 million and EUR 150 million in 2004 prices, is adjusted to current prices by applying the GDP deflator for the EU expressed in Euro and granted after financing of the correction mechanism in favour of the UK. Similarly to the UK correction, this amount is financed by all Member States so there should be no net effect on the budget. However, a negative amount of EUR 1 million was registered, which was caused by differences in the exchange rates similar to those for the VAT/GNI resources.

ANNEX II CONSOLIDATED COMMUNITY ENTITLEMENTS GROUPED ACCORDING TO THE DATE OF ISSUE OF THE RECOVERY ORDER

Pursuant to Article 81 § 3 of the implementing rules of the Financial Regulation, the Accounting Officer of the Commission shall prepare a consolidated list of Community entitlements grouped according to the date of issue of the recovery order. This list is based on the information provided by the accounting officer of each institution and is added to the Commission's Report on budgetary and financial management. This provision having been introduced by Commission Regulation 478/2007 of 23 April 2007, the fifth list is published hereafter. It consists of the number of open recovery orders at 31 December 2011 by year of origin and amounts. The recovery orders between institutions are not reported.

According to the Financial Regulation, the accounting officer of each institution concerned has to follow up any recovery order that is not reimbursed by the deadline for payment. This follow up consists in reminders, formal notices and, whenever possible, offsetting or call of any guarantee. If this pre-litigation phase is not successful, the accounting officer takes legal action before the competent court or recovers by means of a decision which shall be enforceable within the meaning of Article 299 of the TFEU Treaty. The nature of the entitlements consists essentially of recovery of undue payments, fines and own resources.

ANNEX III: ABSORPTION OF OLDEST OUTSTANDING COMMITMENTS IN 2011

The basis of the regular monitoring of the oldest outstanding commitments to be kept open in the EU accounts is the Joint Declaration of November 2002 concluded by the Budget Authority and the Commission. The objective was to bring the situation regarding outstanding commitments under control by the end of 2003 by specifically examining the "potentially abnormal" outstanding commitments and to eliminate all cases identified as unjustified.

"Potentially Abnormal RAL (PAR)" was defined in the Declarations as:

- Dormant commitments in respect of which no payment has been made for the last two financial years. and
- Old commitments that have been in the accounts for at least five financial years

The declaration defines the category of commitments to be monitored. However, it has become clear that in the context of in the normal life cycle of the EU expenditure the criteria do not create a threshold which reliably separates justified old and dormant commitments from abnormal ones. Current monitoring concentrates on old commitments. The objective of the exercise is to assist the Commission services in identifying both unjustified cases, so that they can de-committed, and also justified (still ongoing) cases in order to accelerate their settlement.

The absorption of the RAL is the ultimate objective, but the actual absorption rate is not a satisfactory indicator when the target group contains also normal commitments. A good absorption rate might indicate that easy cases have been kept open in the accounts too long. A very low absorption rate could reflect the situation where all simple cases have been settled long ago and only extremely complicated cases are left.

The following tables illustrate some general absorption trends of the oldest commitments and show the amounts involved in comparison to the total RAL of EUR 207 million. The commitments are broken down to pre-2004 and 2004 commitments enabling comparisons with the previous year.

At the beginning of the year 2011 the open amount of these commitments was EUR 1 919 million, which presented 1% of the total RAL. In the PAR exercise, services classified some 2/3 of open amounts as related to normal or ongoing commitments. In spite of their high age, their settlement follows the general pattern of all outstanding commitments.

The tables below show how similar absorption trends are to the total amounts involved. Absorption rates per service are not presented, as the breakdown between normal cases/dispute cases/contracts which can be closed varies considerably.
