DG Energy and Transport

# Basis for the definition of the future TEN-T in Turkey

The Transport Infrastructure Need Assessment (TINA) study will support the definition of the future Trans-European Network of Transport in Turkey, using the criteria of the decision 1692/96/EC on Community guidelines and further revisions of 2001 and 2004 for the development of the TEN-T

# State of progress on June 2006

- Preliminary network, subject to further analysis, has been identified
- Traffic forecasts are being determined
