Implementing Measures - Comitology

Under the Treaty establishing the European Community, it is for the Commission to implement legislation at Community level (Article 202 of the EC Treaty, ex-Article 145).

Soft Law

Soft Law includes **non binding legal acts** (opinions and recommendations) whose real significance is political or moral and **other forms of Community actions that are not legal acts** but are used for forming and shaping the Community legal order (resolutions, declarations and action programmes).

Institutional framework

In addition to the legislative Acquis your countries will have to play their part in achieving the EU's objectives on poverty reduction. There is a need to develop an aid strategy that gives priority to poverty and country specialisation. This requires a substantial reduction of the number of interventions, joint work with other donors and developing strong learning organisations with adequate monitoring and evaluation capacities.
